Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCHOOL NURSING IN TORONTO, CANADA

.....191....

I hereby authorize Dr.....Medical Inspector to vaccinate .....

.....

my child or ward.

.....

Parent or Guardian.

VACCINATION IS NON-COMPULSORY.

No. 6. INSTRUCTIONS TO PARENTS

TO REMOVE AND PREVENT VERMIN IN THE HAIR

Mix thoroughly equal parts of kerosene oil and sweet oil. Saturate hair and cover the head with a towel, for at least six hours.

Remove towel and comb hair thoroughly with fine tooth comb. Finally wash with plenty of hot water and castile soap. A teaspoonful of washing soda (sodium carbonate) added to each quart of water will aid in removing the oil. Rinse well and dry the head carefully.

The above treatment will prevent nits.

All school children should have their hair combed daily with a fine tooth comb.

No. 7 (orange card).

REPORT OF SUSPECTED CONTAGIOUS DISEASE

School..... .....191....

Address .....

Name..... Age.....

Excluded for suspected.....

Result .....

.....

Medical Inspector.

Address.....

W. E. STRUTHERS, M.D.,
Chief Medical Inspector.

BELIEVE IN SUCCESS

(From George Lawrence Parker's "Simple Thoughts on Great Subjects" in November *St. Nicholas.*)

No thought is quite so big as the thought of success; nor does any idea keep after us quite so persistently. It will not do to deceive ourselves by saying that we do not care for success. That will not do at all. So, right after the beginning of our talk together, let us say at once that we believe in success, that we cannot entirely trust the people who say that success make no difference, and even if we fail in many things, nevertheless we want our very failures to be successes. We may say it is better to have tried and failed than never to have tried at all, and in saying that, we still have at the bottom of it the real idea of success. The same thing is seen in that well-known line of Robert Browning's, "Not what a man does but what a man would do—that exalt him." That is, success holds on to a person who really holds on to success, until it finally raises him to its own level. The appearances may show failures and half successes, but success finally crowns the man who holds fast. We reach our "would-do."
